DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Ahn (US 2002/0072198). Regarding claims 1 and 6, Ahn disclose forming a mask on a substrate; forming at least one trench in the substrate by using the mask; in the presence of the mask, selectively forming a first insulation material (129) only on the substrate in the trench to fill a lower part of the at least one trench in the substrate with the insulation material reducing the aspect ratio of the at least one trench mask; and applying a second insulation material (149) over an entire surface of the structure to fill the at least one trench in the substrate at least up to a top side of the mask (see figures 8 and 9). Regarding claim 2, Ahn disclose the substrate is silicon (100)[0030] the mask is silicon nitride [0030] and the first (129) and second (149) dielectric layers are silicon oxide. Regarding claim 3, Ahn disclose conditioning the dielectric layer [0035]. Regarding claim 4, Ahn disclose the second dielectric layer is formed by a HDP process [0038]. Regarding claim 5, Ahn disclose the second insulation material is planarized by CMP [0037].

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
